

Céole

We are building a sustainable future

Nous construisons un avenir durable

The History of Céole

- Construction of **towers for wind turbines**
- Installation at the **end of 2007** to Dijon-Longvic
- **60 employees**
- Production of steel towers:
 - in 2010: 80 towers**
 - in 2011: 90 towers**
 - in 2012: 120 towers**

Setting-up to Dijon-Longvic

Céole is located in heart of Eastern of France,
which is **ideal for delivering**.

Logistic quality infrastructures to reach sites quickly

- **Ship** Canal of Bourgogne
- **Railway** Crossing SNCF
- **Truck** Direct access to roads for big size transport

A Technical Adventure

Céole builds steel towers:

- Tower's height **60 to 105 m**, in 2 to 5 sections
- Sheet steel plate thickness from 80 mm to 12 mm
- Section's diameter **from 4,5 m to 2,5 m**
- Section from 35 and 80 tons

A Technical Adventure

10.000 m² of building on a ground of 65.000 m²

- A **steel workshop** of 5.000 m²
- A **surface treatment workshop** of 1.000 m²
- A **mounting of internal equipments** workshop of 2.000 m²
- An **outside storage area** for finished products 20.000 m²

THE STEELWORK

THE SURFACE TREATMENT

THE INTERNAL EQUIPEMENTS MOUNTING
