

## **WSB Neue Energien: Increase of more than 135 MW on national and international market for 2013**

**Dresden/Vienna 4 February, 2013 – Encouraging business perspective at the fair for wind industries EWEA in Vienna: WSB Neue Energien GmbH realises in 2013 renewable energy projects with a capacity of more than 135 megawatts (MW).**

In 2013 WSB Neue Energien GmbH continue to dedicate themselves to accelerate foreign markets. Both in Germany as well as abroad many encouraging projects are being established: "The year 2013 will be a milestone in the history of our enterprise. Within 12 months we are going to install wind and photovoltaic plants in a size that clearly shows how highly efficient WSB is", their CEO Andreas Dorner states. In France alone four projects of a volume of 43 MW will be realised within the next few months. Among them are three wind parks as well as a PV project of the first sale by tender of 5 MW. In addition to that there will be further construction projects of a volume of another 28 MW in Germany and the Czech Republic.

In their neighbour country Poland the expansion of renewable energies is also forced intensely. The first foundation for a 45 MW project has already been placed – one of the biggest individual projects of the Dresden enterprise. Starting in summer 2013 about 28.000 houses in the area of Legnica can be provided with green power from wind energy. The first Romanian project of the WSB is to go on line presumably in the 4th quarter of 2013. In the area of Neamt they are currently preparing the construction of a wind park with a rated output of 20 MW.

*+++ WSB Group is currently presenting itself at the EWEA Annual Event in Vienna, exhibition hall B, stand B-G54 from 4 to 7 February, 2013. +++*

### **About WSB Group**

WSB Group with its headquarters in Dresden is a leading full-range provider of renewable energy projects. The main business involves project development and the marketing of wind parks and photovoltaic plants. Since 1996 WSB has constructed more than 320 wind energy and solar plants with an installed capacity of about 527 MW and a project volume of more than 810 million Euros. Within the corporation and its associated enterprises more than 200 staff members are employed in Germany, France, Italy, Poland as well as in the Czech Republic, Romania and the Ukraine.
