

LLC «MANAGEMENT COMPANY «WIND PARKS OF UKRAINE» is founded for business development in construction and operation of wind power plants in Ukraine.

The company is a vertically integrated structure that has possibilities to select appropriate sites, arrange wind measurement, obtain approvals, land and connection licenses, oversee the construction process, produce and montage wind turbines and provide their maintenance.

Wind turbine assembling and some main components manufacturing has been launched in July 2012 in the territory of Ukraine, located in Kramatorsk city in Donetsk region. There is a strategic partnership with Fuhrlander Aktiengesellschaft (Germany) and FuhrlanderWindTechnology Ukraine.

«Wind park Novoazovskiy» (57.5 MW) followed by «Wind park Ochakovskiy» (37.5 MW) was the pioneer in Ukrainian modern wind power sector. It has been successfully producing clean electricity since July 2011. The wind parks are equipped with WTG of 2,5 MW type Fuhrlander FL2500-100.

«Wind park Kerchenskiy» (25 MW) is going to be completed in February 2013 with potential expansion to 150 MW.
«Wind park Prisivashskiy» is already under construction now.

Within a period of two years the three wind parks have commissioned capacity of 120 MW, that is much more than there have been commissioned for 15 years. The issue is not only in quantity but also in applying new sophisticated wind power technologies and modern construction standards.

Being the key market player in 2010-2012, the company will play an important role in the wind power business development in Ukraine and plans to reach capacity of 1 GW in the following years. Autonomous Republic of Crimea and Ukrainian mainland are strategically important regions for further development of our company.

The company efficiently combines approach of vertical integration in Ukraine with technological innovation, wide international cooperation and strategic partnerships for business expansion and financing.
