

Product Technician

SgurrEnergy is an international renewables engineering consultancy. We are one of the UK's leading technical advisory organisations specialising in renewable energy, power generation and transmission, including wind, wave, hydro and bio energy. Owing to continued growth and high demand for its services, the company is now seeking to recruit an Engineering Technician to join our expanding Product Development team based in Glasgow.

Job description

Reporting to the Product Group Manager, the principal responsibilities of this post include:

- Coordination and management of test facility activities including LiDAR installation at the test mast and satellite test locations
- Ancillary equipment installation and commissioning e.g. power supplies and instrumentation
- Data recovery, screening and reporting of test results
- Responsible for adherence to safety, quality, environment and quality (SHEQ) management at the test facility
- Coordination of test site visits and liaison with clients and landowners
- General test facility and ancillary equipment maintenance
- Provide information and feedback as required for monthly reporting

Other duties may include but are not limited to:

- Transportation, delivery and deployment of LiDAR and associated training to clients in UK and overseas
- Troubleshooting technical issues
- Other ad hoc activities as and when required

Essential criteria

- HNC or above in engineering or a technology based subject
- PC literate and a competent user of Microsoft packages
- Reliability and good organisational skills are paramount
- You should have excellent communication skills, flexible with a proactive approach to work
- Valid European Driving License

Desirable criteria

- SHEQ awareness competency
- Technically competent in electrical and mechanical disciplines
- An interest in renewable energy and/or sustainability
