The Event in Detail

EWEC is Europe's premier wind energy event. It is the only international wind energy forum that brings together all the disciplines that affect the wind industry – business; policy; science; and technology. As a result, it attracts a high number of professionals, leading experts and exhibiting companies from across the globe.

No other wind energy event offers this unique combination of opportunities to engage in high level political debate, technical discussions, business and networking.

No other wind event is so authoritative and informative, for exhibitors and visitors alike.

Which is why no-one who is serious about the wind industry can afford to miss EWEC.

"Leading experts, policy makers and companies from around the world will discuss international best practice and showcase the latest technological developments. Through this exchange of information, EWEC 2006 will help bring market oriented and sustainable responses to energy markets across Europe." **Ian Mays, Conference Chair / Managing Director, RES, UK**

Programme of Events - 27th February to 2nd March 2006

Conference

Over 200 presenters from the leading companies and institutions will speak in 40 separate business, technical and workshop sessions, and there will be over 300 visual presentations and 8 parallel workshops from the world's leading experts. The choice is massive, and you can be sure of two things:

- **The latest information.**
You will be able to keep up to date with all the latest developments in business, policy, science & technology
- **The best networking.**
You will be able to meet key decision makers and leading figures from the wind and electricity industries

Opening Session - Monday 27th

Dimitris Sioufas, Greek Minister for Development will open the conference and the following keynote speakers from a wide variety of political backgrounds have been invited:

- Stavros Dimas, Commissioner for Environment
- Claudio Scajola, Minister for Productive Activity, Italy
- Jürgen Trittin, Minister for Environment, Nature Conservation and Nuclear Safety, Germany
- Martin Bartenstein, Federal Minister of Economics and Labour, Austria
- Britta Thomsen, MEP, Vice-Chair of ITRE Committee, European Parliament

Plenary Sessions

Monday 27th: Large Scale Integration – towards 12% penetration in Europe – a reality?

Wind power is on course to become an increasing part of Europe's power mix. EWEA business forecast sees 180GW of wind generating 12% of Europe's total TWh requirements by 2020, and delivering 37% of all new EU generation capacity. The challenges of realising a double digit share of Europe's power needs will be discussed and debated by key players at the front-line of the mainstreaming of wind.

Tuesday 28th: Wind's role in the global energy market

The world's energy mix is undergoing a fundamental shift. The IEA estimates that by 2030 the global power sector needs 4,800GW of new capacity at a cost of €16 trillion. There are various traditional and new options on the table - oil, gas, coal, clean coal, nuclear, and now wind. How does wind fit into the global energy picture?

Wednesday 1st: Manufacturers – CEO Vision session

CEOs from the world's leading turbine manufacturers (together supplying over 7,000 MW in 2004) have been invited to discuss their long term vision on industry structure, consolidation, globalisation, emerging markets and technology developments. Do not miss this opportunity to hear the latest opinions from the leaders of the biggest turbine manufacturers.

New Event: Global Wind Energy Council Annual Wind Energy Summit

Key decision makers from governments and institutions around the world and CEOs from leading companies will meet to discuss the strategic political wind energy agenda for the coming 12 months.

Social Events

We plan memorable social events offering a unique experience of Athens, including a surprise social event for all EWEA members.

"The largest and most interesting forum for European industry and science to exchange information and the latest findings on the wind energy sector."

Jürgen Trittin - German Federal Minister for the Environment, Nature Conservation and Nuclear Safety

Conference Sessions

Business & Policy Issues

- Finance and insurance
- Market development and structures
- Policies and programmes
- Integrating wind into electricity markets
- New commercial wind turbines
- Offshore: developments and prospects
- Climate change policies
- Environmental issues
- Winning hearts and minds

Technical Developments

- Resource assessment
- Aerodynamics and loads
- Aeroacoustics
- Electrical system design, integration and control
- Condition monitoring and measurement
- Innovative turbines, components, systems and techniques
- Autonomous and distributed systems
- Offshore – technology trends
- Small wind turbines

Scientific Advances

- Meteorology: forecasting, resource assessment methods & satellite observation
- Aero-elasticity and loads
- Aerodynamics and aeroacoustics
- Control systems and strategies
- Grid integration: large scale, micro scale and storage
- Measuring methods & monitoring
- Turbines and components
- Design methodology (incl. external conditions)

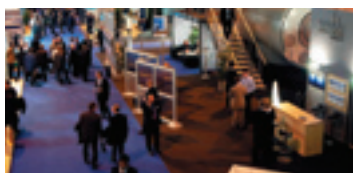

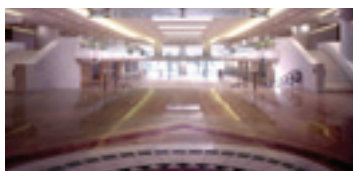

Why Attend EWEK 2006?

- You will gain first hand knowledge and experience from industry leaders, politicians and the research community
- You will benefit from unique and unrivalled networking opportunities
- You will obtain insight in, and understanding of the key issues
- You will be able to develop strategies that will yield a competitive advantage

What will you discover?

- New market opportunities and corporate strategies
- Financial solutions and models
- Changing role of regulators in the liberalised market
- Latest technology and trends
- Policy & regulatory frameworks from across the EU and beyond
- Successful projects, case studies and strategies
- All the latest products and services

Exhibition & Venue - visit www.ewec.info for the latest floor plans, exhibitors list and booking forms

The Megaron International Conference Centre sits next to the Athens Concert Hall, itself described as a 'masterpiece' by Francois Mitterand. The Conference Centre is one of the largest, finest, and best equipped in the world.

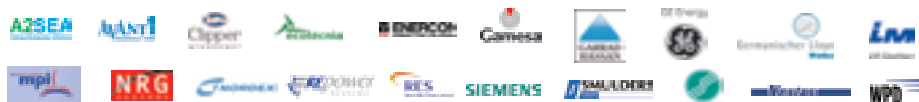

Exhibition Entrance fee : €40/day (includes all coffee breaks, lunch and exhibition catalogue)

The exhibition and conference are located in the same building. All coffee breaks and lunches are held in the exhibition halls, facilitating a fully integrated event with unrivalled networking opportunities.

Exposure: Showcase your latest products and services to the large number of professional visitors
Credibility: Position your company at the heart of the International wind industry

Over 100 of the worlds leading companies have already booked space, and the available exhibition space has almost sold out.

2006 Exhibitors include:
