

### **German technical management company for wind turbines launches subsidiary in Romania**

#### **WSB Service SRL in contract negotiations to manage a 20 MW wind park**

**Dresden/Bucharest, 4 February 2013 – The WSB Service Group is expanding its foreign business by taking over the technical management of a wind power project in north-east Romania. The subsidiary, WSB Service SRL, which was founded in December 2012, will probably take over the management of the plant from the autumn of 2013 onwards.**

The development of this new line of business is being accelerated by the Romanian WSB Service subsidiary and its wide range of services. The team in Bucharest not only provides the technical management for renewable energy plants, but also looks after the electrical infrastructure – e.g. transformers. The main focus of business is to ensure that the efficiency of all the plants is maintained in the long term, their availability is maximised and yields are optimised. “We’ve already proven in the Czech Republic and Poland that we’re able to tap into new markets. The Romanian business reinforces our commitment to Eastern Europe,” says Stephan Neugebauer, Managing Director of WSB Service GmbH.

The contract negotiations, in which WSB Service SRL is involved to manage the 20 MW wind park, have nearly been completed. Talks with plant operators, which are mainly based in the Dobrogea region, are also taking place alongside the market entry.

WSB Service GmbH now has a new Internet site. Operators of wind power and solar power units, investors and business partners can now obtain an extensive idea of all the services provided by the technical management specialist at [www.wsb-service.de](http://www.wsb-service.de)

*+++ Meet WSB Service GmbH at the EWEA main event in Vienna on stand B-G54 (Hall B) on 4 – 7 February 2013. +++*

#### **About WSB Service GmbH**

WSB Service GmbH is a technical management company for wind and solar-powered plants in Germany and abroad – regardless of which company manufactured the equipment. It is currently managing about 250 plants. The company’s high quality standards are guaranteed by using the quality management system certified according to ISO 9001:2008. The company, which has its headquarters in Dresden, was founded in 1999 and currently employs 47 people.
