## ECOSEM®: cooperation with QUANTEC NETWORKS and MICROSENS

### Visit us at stand: 7A52 Hall 6

ECOSEM® will present during this European Wind Energy Association exhibition its Cooperation with QUANTEC NETWORKS and MICROSENSE.

#### **Description of the companies:**

**ECOSEM®** | [www.ecosem.es](http://www.ecosem.es) | [info@ecosem.es](mailto:info@ecosem.es)

ECOSEM® S.L. offers high quality meteorological technology and products for wind and solar energy monitoring and regulation. We also supply components for wind site assessment, wind farm monitoring and equipment for wind farm control of production.

**QUANTEC NETWORKS** | [www.quantecnetworks.de](http://www.quantecnetworks.de) | [denise.schroten@quantec-networks.de](mailto:denise.schroten@quantec-networks.de)

Core competencies: long life obstacle lights – intelligent LED obstacle light systems for onshore and offshore operation; IT solutions – remote real-time data monitoring, control and regulation systems, e.g. for remote controlling of wind and solar farms; service – installation of hardware and software, repair services, measurement and evaluation service.

**MICROSENSE** | [www.microsens.com](http://www.microsens.com) | [JMenz@microsens.de](mailto:JMenz@microsens.de)

As a leader in supplying fiber optic transmission and access systems, MICROSENS offers devices and systems that satisfy the highest requirements in terms of performance and reliability. Market oriented development combined with the latest production technology ensures high end solutions that are optimally tuned to the customer expectations.

#### **Other partners:**

**AMMONIT** stand 7B53

**WIND HUNTER GROUP** stand 7B93

**Wind is our passion!** Follow the symbol and discover more about our products and services. Visit us at our stands.
