Vestas to reinforce call for ambitious EU renewable energy targets at EWEA 2014

From March 10 to 13 2014 wind energy players will discuss new technological developments, showcase their experience, latest products and services and debate on future wind sector trends at EWEA 2014, in Barcelona, Spain.

Vestas, world leader in wind energy, will actively participate at Europe's premier wind energy event which not only offers a platform to showcase cutting-edge technological knowledge, but also high level debates on European policy, markets and financial issues.

At Barcelona, Vestas will also be providing a global perspective on the European wind energy sector. This will happen through participation in presentations, workshops and panels such as the *Industry leaders' debate*, Tuesday, March 11 (8:30 -10:30, Ponent room), where Anders Runevad, Vestas' President and CEO, will be taking the floor.

Vestas will have a 210 sq. meter booth at the exhibition (*Hall 7, stand 7C20*), which will be staffed by Vestas employees who will be pleased to discuss products, services and after sales solutions, together with perspectives on wind energy.

The booth will also host several rounds of presentations on Vestas' 2 MW and 3 MW platforms and offered services and will feature touch screens to interact with Vestas' and wind energy world.

Vestas will showcase all the products and capabilities that allowed us to pioneer the wind energy sector in more than 30 markets out of the 73 where we currently have installations. Through the newly launched Wind Power Pioneers platform, Vestas will share with customers and stakeholders the learnings of over 60 GW of wind power installed globally, for them to achieve new business objectives and together overcoming new challenges and reach new milestones.

EWEA 2014 will also be the platform for Vestas' Act on Facts campaign to be launched in Spain by the Asociación Empresarial Eólica, the Spanish wind energy association (AEE), supported by Vestas. The campaign - which will be introduced to Spanish citizens and EWEA visitors - is aimed at ensuring global citizens have an informed and balanced perspective about wind energy.

Launched for the first time in June 2013 in Australia, Act on Facts is a digitally-based global campaign designed to separate anti-wind rhetoric from reality and channels public support toward political action favouring wind energy.

For regular Vestas' updates live from the EWEA 2014, follow us on [Twitter](#) and interact with us across all our social media channels.

Vestas looks forward to another successful EWEA Wind Energy Fair, and invites all attendees to visit the Vestas booth in hall 7, 7C20.

About Vestas

Every single day, Vestas wind turbines deliver clean energy that supports the global fight against climate change. Wind power from Vestas' more than 51,000 wind turbines currently reduces carbon emissions by over 60 million tons of CO₂ every year, while at the same time building energy security and independence.

Vestas has delivered wind energy in 73 countries, providing jobs for around 16,000 passionate people at our service and project sites, research facilities, factories and offices all over the world. With 62 per cent more megawatts installed than our closest competitor and more than 60 GW of cumulative installed capacity worldwide, Vestas is the world leader in wind energy.
