### new course on offer at akademia wiatru

#### **banksman-slinger course success**

akademia wiatru has expanded its range of courses with a new banksman-slinger course. The first course was organised for Fairwind Poland and run by experienced lecturers capable of providing theoretical knowledge alongside practical experience. The participants were able to put their freshly gained theory into practice while working with a crane. The course was a mutual learning experience for both the participants and lecturers, and as it turned out to be a great success, it has been entered permanently into akademia wiatru's repertoire of courses available on demand.

#### **about akademia wiatru**

akademia wiatru is a centre of competence and training platform which aims to share and proliferate its acquired know-how in the field of wind energy. The company offers a variety of training opportunities for workers working in, on and around wind turbines. akademia wiatru is the first GWO accredited training provider in Poland.

**akademia wiatru will be presenting its range of courses at EWEA 2014 at stand 7B93.**
