Press release: Meet MMT at EWEA Offshore 2015

MMT will be exhibiting at EWEA Offshore 2015, stand C3-C15 at Bella Centre, Copenhagen Denmark, 10-12 March 2015

As being the world's largest offshore wind energy event, with participants coming from more than 50 countries, it is a great meeting place for us to showcase our marine survey solutions to the highest quality audience within the offshore wind industry. Ola Svensson, MMT's Project Manager, will have a presentation about our geophysical, geotechnical and UXO surveys from offshore wind projects at our stand on Wednesday the 11th of March at 16.00 hrs. You will also have the opportunity to hear about our latest innovative survey solution with the survey ROV Surveyor Interceptor and our fully equipped survey vessels. Meet our sales and technical teams as well as management. We will serve you cold sparkling water and special designed bottles and some sweets over a nice chat in our stand.

MMT is a marine survey company that collect, process and visualise the conditions of the seabed. We offer assured surveys in bathymetric, geophysical and geotechnical services, specialising in the oil & gas, hydrography and renewable energy & marine cable sectors. Our competence and services supplies their clients with the relevant information, designed to fit the industries planning processes of offshore infrastructure projects. MMT was founded in 1976 and has today 250 employees and offices in Sweden, UK and Norway.
